

House Rent Application - Technical Architecture

Architecture Flow

Technologies Used

Frontend: HTML, CSS, JavaScript, React.js, Axios, Bootstrap, Material UI

Backend: Node.js, Express.js

Database: MongoDB

Project Flow

1. User accesses the UI.
2. React.js displays the application.
3. Axios sends API requests.
4. Node.js receives the request.
5. Express.js processes the request.
6. MongoDB stores/retrieves data.
7. Response is returned to the frontend.
